261 PROGRAM IN MONOMIC POLICY MAN

09 SEP 2016

(1) (1) (1) (1) (1) (1) (1) (1) (1)

Dear Colleagues:

I am writing to alert you to our 12-month master's program in Economic Policy Management at Columbia University's School of International and Public Affairs. The Program in Economic Policy Management is designed to provide promising professionals and policymakers of demonstrated achievement and superior promise with the skills required to design and implement economic policy effectively, with a strong emphasis on the policy issues of developing and transition economies. The Program was initiated as a cooperative endeavor of Columbia University's School of International and Public Affairs, Graduate School of Business, and Department of Economics in cooperation with the World Bank. The Program maintains a strong connection with the World Bank through its Joint Japan/World Bank Graduate Scholarship Program, which provides full scholarships support for up to 12 students from emerging economies each year.

Its position, at the heart of Columbia, offers students an Ivy League education at one of the top universities in the world, with access to courses and events featuring world-renowned experts in their fields. The intensive 12-month program of study provides unparalleled training in micro and macroeconomic policy management, international finance, econometrics and supporting courses in management and development science. The program also hosts tracks in Global Energy Management and Policy and Central Banking and Financial Markets. The program begins in late May and culminates the following May, offering a Master of Public Administration degree from Columbia University.

Upon graduation from the program, students join an alumni network that spans 140 countries around the globe and includes current and former finance ministers, governors and deputy governors of central banks, and CEOs and top managers in private and public sector organizations.

We believe that this program offers an incomparable opportunity for students to obtain a world-class education in economic policy in just 12 months. We urge you to take this opportunity to identify potential candidates for the Program and to encourage them to apply for admission to the Program.

Please do not hesitate to contact us if we can provide more information or be of any other assistance. Further information on the program is available online at www.sipa.columbia.edu/pepm.

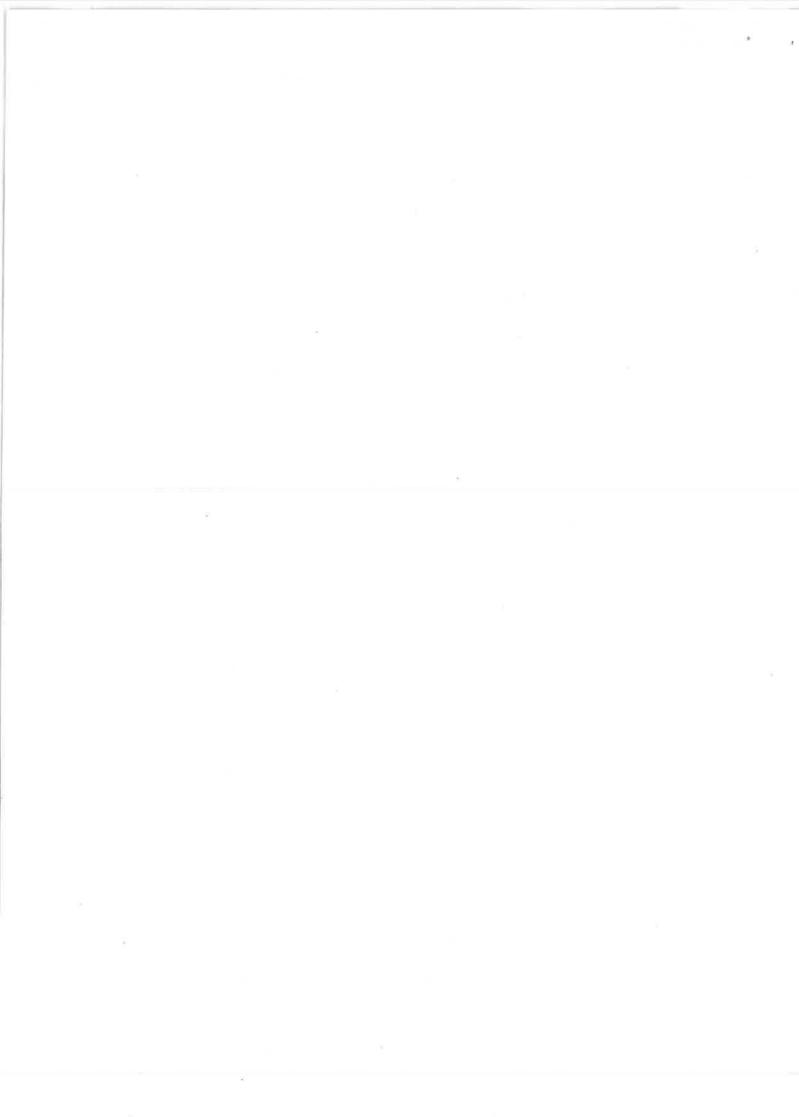

Sincerely,

Guillermo Calvo

PEPM Tracks

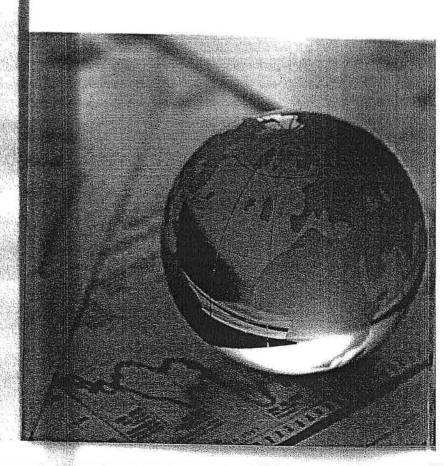

The summer term for all three tracks. It countered Policy Management (EPM), Global Linerary Management and Policy (GEMP), and Coentral Banking and Financial Markets (CBLM). In the same. Fall and spring terms differ all phily depending upon which track students are to

Economic Policy Management:

Builds students' technical competence with the tools of economic management and policymaking and their application; and raiso educates students about current thinking on the global economic environment, as well as the history and institutions.

Student background: Students who select this track come from national and international development agencies and international fin and a institutions and banks. The track is also popular among professionals with consulting and logal backgrounds.

PEPM Curriculum

The core of the PEPM program consists of two three-semester course sequences in Macroeconomic Policy Management and Econometrics. This core is supplemented by courses in management skills and political economy. Students may choose additional elective courses offered at SIPA and other graduate schools at Columbia. Each course is built around real-world examples and case studies.

Global Energy Management and Policy:

Teaches the fundamentals of the energy industry, including international energy systems and business organizations involved in the production, transportation, and marketing of energy products.

Student background: This track was designed for individuals from energy ministries, national oil companies, and energy-producing firms, and for other professionals from around the world who are involved in different aspects of the global energy markets.

Central Banking and Financial Markets:

Builds an in-depth understanding of corporate finance, capital markets, and central hanking, covering both emerging and advanced economies while also examining the process of building sound capital markets in emerging economies.

Student background: Mid-carred professionals working at central banks, finance ministries, and various financial institutions
