SUMMIT: INTEGRATED REHABILITATION CARE OF SPINAL CORD INJURIES

A

Short term training course
For Health professionals
from the Global South

23 MARCH – 3 APRIL 2026

Conducted by
The National Institute
for Entrepreneurship and Small Business
Development, New Delhi

In partnership with

Indian Spinal Injuries Centre,
New Delhi

With 1 in 3 persons living with a condition that benefits from rehabilitation, provision of affordable rehabilitation services is a subject of global concern.

Spinal Cord Injury (SCI) is one such condition which requires comprehensive rehabilitation services,

SCI affects more than 15 million people world wide. It is particularly devastating because it is often sudden and can affect any age group. Even if they receive adequate medical attention, people with SCI suffer social exclusion and premature mortality.

Provision of good and comprehensive rehabilitation services enable people with SCI to enjoy a good quality of life and contribute fully to society.

Provision of such rehabilitation services is not only a matter of setting up hospitals and training medical professionals. It is also a matter of entrepreneurial motivation; leadership; financing; community integration; and service delivery models.

This ITEC course on INTEGRATED REHABILITATION CARE OF SPINAL CORD INJURIES provides health care professionals of countries from the Global South to travel to India and learn comprehensive rehabilitation in SCI at one of the most eminent facilities in this domain—the Indian Spinal Injuries Centre (ISIC). Along with rehabilitation, course participants would also be exposed to the leadership, networking and entrepreneurial skills for setting up such facilities through another eminent institute--The National Institute for Entrepreneurship and Small Business Development (NIESBUD).

Each story of a person who has overcome setbacks due to SCI with successful rehabilitation is an inspirational case study about how—in the words of Maj. HPS Ahluwalia, founder of ISIC and himself a SCI patient—the mind can conquer the **summit** of life.
